

## The Implant Centre team

A dedicated team of dentists, doctors, nurses and technicians to help you with your implant options and treatment.

### Mr Bill Schaeffer

BDS, MBBS, FDS RCS Eng, MRCS Eng

Bill Schaeffer is qualified as both a dentist and a medical doctor. He has both a fellowship and a membership from the Royal College of Surgeons of England. He has extensive training in Oral and Maxillofacial surgery and is registered by the General Dental Council as a specialist Oral Surgeon. Bill has been placing dental implants since 1997 and has lectured both in this country and abroad on the topic of dental implants.

### Mr Guy Barwell

BDS, MBBS, FDS RCS Eng, BSc

Guy Barwell qualified as a dentist and medical doctor from Guy's and St Thomas' Hospital with distinctions. In 1993 he read Psychology with the focus of his degree as reducing dental anxiety. He was awarded a fellowship in Dental Surgery from the Royal College of Surgeons of England in 1998. Guy is very experienced in all aspects of implant dentistry with particular focus on treatment planning, implant surgery & safe bone augmentation.

### Dr Jonathan R Murphy

Specialist in Prosthodontics BDS MFDS

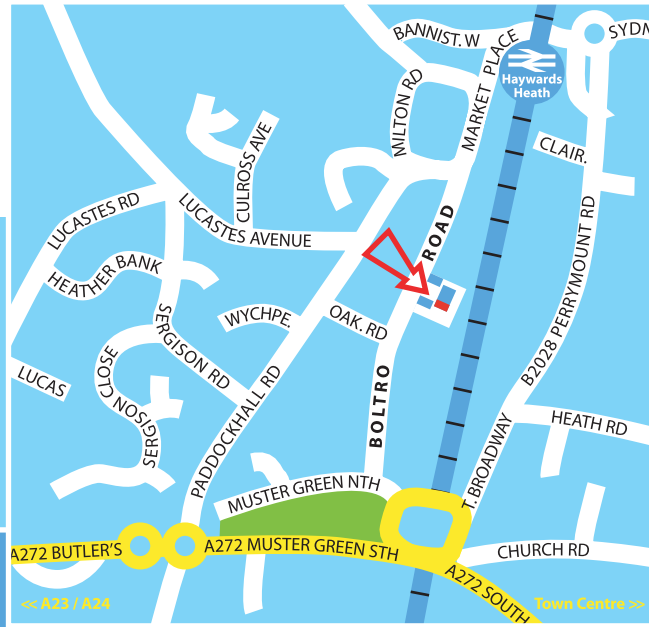

RCPS Glasg MClInDent (Prost) MRD (Prost) Lond

After qualifying from Guys' Hospital Jonathan undertook hospital appointments in oral surgery and restorative dentistry followed by experience in general practice. Jonathan was a Specialist Registrar in prosthodontics at King's College for four years, obtaining an MRD and MClInDent in 2005. To keep up to date with current techniques and advances Jonathan regularly attends conferences in Europe and America.

of beautiful teeth

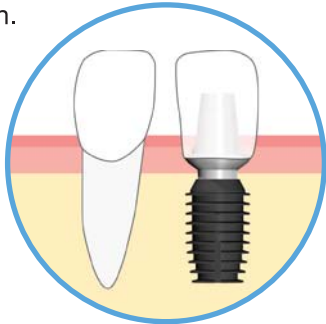

Advanced Implant Services Ltd

## Dental Implants

Implants are the only truly long-term solution to tooth loss, they prevent the need for loose and uncomfortable dentures and solve the damage to teeth that bridges will cause.

Secure and comfortable, implants look, feel and function like real teeth. You don't remove them at night and you won't suffer hot and cold sensitivity.

Dental implants can offer a wonderful, realistic cosmetic result, in fact, it is often impossible to tell the difference between implants and your natural teeth.

## Can I have implants?

you are a candidate for a dental implant if you:

- are missing one or more teeth
- have failing teeth
- require root canal therapy
- have failing crowns or bridges
- suffer loose or uncomfortable dentures
- need to secure a denture

## Easy to look after

With simple brushing and flossing, implants can last a lifetime.

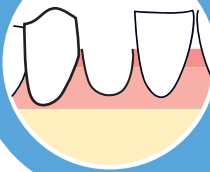

"Before and during the treatment I was kept fully informed of all aspects of the procedure and was constantly reassured. The end result has been a perfect set of teeth indistinguishable from natural teeth" M. McGee

## The Procedure

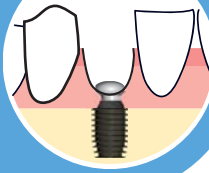

Initial Assessment

1

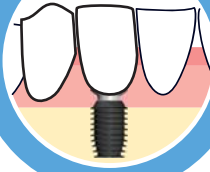

The implant is placed below the gum and a temporary tooth can be placed.

2

Permanent crown is placed

3

## Initial consultations and treatment plan

The implant team will carry out a thorough assessment, determine what you want and discuss your options. You will be given a detailed treatment plan and have as much time as you need to ask questions and consider what is involved.

## Implant placement

A titanium post is placed under the gum as a very strong replacement for your natural tooth root. We provide you with a temporary tooth whilst the implant integrates with the jaw bone (this usually takes about 12 weeks).

## Permanent crowning of the implant

The permanent crown is carefully crafted to look and feel like a healthy, natural tooth that perfectly matches your own.

## The Implant Centre

A state of the art centre dedicated to providing high quality cost effective dental implant treatment.

## A caring service

Your implant team will take the utmost care not only in your treatment, but also in the explanation of the procedures involved and the way you are treated.

We take care to understand your feelings and needs to ensure that you are completely confident with the procedure and totally satisfied with the final outcome.

## A specialised treatment

A dedicated team of specially trained dentists, doctors nurses and technicians.

- explain fully all your options and procedures
- compile a personalised treatment plan
- work exclusively with dental implants
- use the most advanced techniques and materials
- provide a competitive affordable service

"I feel confident now, cosmetically and when eating, I do not have to worry anymore about my crown falling out when eating out, on holiday, at work or any other embarrassing times" D. Borley
